STANISLAUS RIVER WATERSHED			
Kennedy Meadows Planning Unit			
Form letter – see comment from Matt Bloom. Additional comments: I am part of a family that visits Kennedy Meadows every year and we just finished our 38 th annual. I pray that nothing changes at Kennedy Meadows. It is a sacred place and should be shared for years to come.	Adam Giovannetti	No	As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands. In addition, the Stewardship Council has developed potential measures to preserve and enhance the Beneficial Public Values (BPVs) at Kennedy Meadows. Should these potential measures be implemented, they are not expected to negatively affect the pack station or other resources, but rather enhance the facility and BPVs within the planning unit. See response to Matt Bloom form letter comment.
Form letter – see comment from Matt Bloom. Additional comments: My husband and I have been going to Kennedy Meadows since we moved here in 1999. We love the character and charm and warmth from Ada and Al and can't imagine losing this piece of history from our county.	Adrienne Fryhoff	No	As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands. In addition, the Stewardship Council has developed potential measures to preserve and enhance the Beneficial Public Values (BPVs) at Kennedy Meadows. Should these potential measures be implemented, they are not expected to negatively affect the pack station or other resources, but rather enhance the facility and BPVs within the planning unit. <p>Form letter – see comment from Matt Bloom. Additional comments: Kennedy Meadows is part of Tuolumne County history. Stop taking our landmarks away. I have been going to that resort for 6 year as many other native born residents have. PG&E make other arrangements to trade plain land that is not someone’s livelihood.</p>	<p>Aileen Johnston</p>	<p>No</p>	<p>Comment noted. As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands. In addition, the Stewardship Council has developed potential measures to preserve and enhance the Beneficial Public Values (BPVs) at Kennedy Meadows. Should these potential measures be implemented, they are not expected to negatively affect the pack station or other resources, but rather enhance the facility and BPVs within the planning unit. As per the Settlement Agreement and Stipulation, PG&E must protect all of the Watershed Lands with perpetual conservation easements and/or donate the lands in fee title to a qualified donee (public entity, non-profit organization) those lands that are deemed not necessary for current and future operations and maintenance of their hydropower projects. Donated lands must also be protected with perpetual conservation easements to be held by a third party. The Stewardship Council is developing an explicit set of criteria that will be used to determine which potential donees are qualified to participate in the disposition process. Qualified conservation easement and fee simple donees will be determined during the disposition process (Volume III). There will be opportunities for the public and stakeholders to engage with the Stewardship Council and other stakeholders on this topic as well as other topics related to the disposition and future management and stewardship of the lands. The Stewardship Council will provide public notice and encourage participation in meetings, workshops, and other appropriate methods of participation in the planning process. See response to Matt Bloom form letter comment.</p>

<p>I wish to express my support for the donation of the Kennedy Meadows property owned by PG&E to the Tuolumne County Resource Conservation District or allowing PG&E to retain ownership and place a conservation easement on the property with TCRCO as the manager of the easement. I have been enjoying varied recreational activities at Kennedy Meadows for over 40 years, including backpacking, horse-pack trips, hiking, picnicking, fishing, and camping, and fine dining at the lodge. This resort is unique in that it offers opportunities for all ages and levels of fitness. I fear that if the Forest Service gains control of the property the varied family-friendly activities will be eliminated and the area will become a quota trailhead for the physically superior elite. Please base your decision regarding the future of the resort on preserving the traditions and atmosphere we and our predecessors have enjoyed for decades.</p>	<p>Anita Moran Slicton</p>	<p>No</p>	<p>Comment noted. Comment	Commenter	Edit to Vol II Made	Response
<p>This concerns the properties currently held by Pacific Gas and Electric. These lands are being privately held contribute to the tax base of the counties in which they are located. Many of these counties carry an undue burden of much government held lands that they are obligated to aid in fire suppression, policing, search and rescue as well as educating the children of employees that reside on government held lands. The transfer of land from the private sector to a government agency with the accompanying loss of property tax could cause damage to public safety and the educational districts in these counties in perpetuity. One must also consider the potential loss to our culture should the businesses that lease some of these lands be negatively impacted. Kennedy Meadows, as an example, provides one the opportunity to live and recreate much as the generation of the nineteen thirties did. This is an opportunity to increase our cultural awareness, with regard to the generations that helped create the society in which we live today. Heritage businesses such as this need to be protected. Once lost it would be difficult to replace them without a Disney like or some other aggrandized view of the past creating a dishonest view of the roots of our culture.</p> <p>With regard to the tax problem, Federal offset funds do not carry the guarantee that property tax currently does.</p> <p>I have difficulty seeing how PG&E property being transferred to a government entity will effectively lower my power bill; I can see however, that this property being unavailable for future hydropower needs could decrease our supply.</p> <p>Thank you, for your attention to this matter.</p>	<p>Barry & Evelyn Cunningham</p>	<p>No</p>	<p>The Stipulation requires property tax revenue, other equivalent revenue source, or a lump sum payment to be provided to each of the 22 counties, so that the totality of dispositions in each affected county under this Land Conservation Commitment will be property tax neutral for that county. Accordingly, the Stewardship Council is establishing a process to determine changes to property tax revenue resulting from its activities, and how to compensate the counties for any such changes.</p>

<p>I support allowing PG&E to retain ownership of Kennedy Meadows and placing a conservation easement on the property with Tuolumne County Resource Conservation District as the manager of the easement. I strongly oppose donation of the property to the Forest Service because they have a reputation for destroying traditional uses of forest properties and narrowing use so that only a select few may access the areas. Kennedy Meadows Resort is an important part of the culture of Tuolumne County. Its history and wide range of recreational activities have given pleasure to the young and old, and the fit and infirm for decades. We need more of these places where families and people of all fitness levels can enjoy the outdoor experience. Kennedy Meadows is a special place. Please keep it like it is now by allowing PG&E to retain ownership and place a conservation easement on the property.</p>	Gale A. Slicton	No	<p>Comment noted. As per the Settlement Agreement and Stipulation, PG&E must protect all of the Watershed Lands with perpetual conservation easements and/or donate the lands in fee title to a qualified donee (public entity, non-profit organization) those lands that are deemed not necessary for current and future operations and maintenance of their hydropower projects. Donated lands must also be protected with perpetual conservation easements to be held by a third party. <p>Form letter – see comment from Matt Bloom. Additional comments: Please, please to the T.C. Resource C.D. help the Blooms retain their resort at Kennedy Meadows. We have used the Lodge on many occasions, i.e., a wedding in May, and many packing trips, etc., fishing trips – using their facilities.</p>	<p>Gertrude Lucia</p>	<p>No</p>	<p>Comment noted. As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands. In addition, the Stewardship Council has developed potential measures to preserve and enhance the Beneficial Public Values (BPVs) at Kennedy Meadows. Should these potential measures be implemented, they are not expected to negatively affect the pack station or other resources, but rather enhance the facility and BPVs within the planning unit. The Stewardship Council is developing an explicit set of criteria that will be used to determine which potential donees are qualified to participate in the disposition process. Qualified conservation easement and fee simple donees will be determined during the disposition process (Volume III). There will be opportunities for the public and stakeholders to engage with the Stewardship Council and other stakeholders on this topic as well as other topics related to the disposition and future management and stewardship of the lands. The Stewardship Council will provide public notice and encourage participation in meetings, workshops, and other appropriate methods of participation in the planning process. See response to Matt Bloom form letter comment.</p>

Form letter – see comment from Matt Bloom. Additional comments: We have enjoyed the facilities at Kennedy Meadows for many years and made use of its many recreational opportunities: cabins, fishing, access to the Emigrant basin by horseback, dining, picnicking and general enjoyment of the outdoors in a comfortable friendly setting. Please keep it as it is!	Gordon & Jean Hansen	No	As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands. In addition, the Stewardship Council has developed potential measures to preserve and enhance the Beneficial Public Values (BPVs) at Kennedy Meadows. Should these potential measures be implemented, they are not expected to negatively affect the pack station or other resources, but rather enhance the facility and BPVs within the planning unit. See response to Matt Bloom form letter comment.
Form letter – see comment from Matt Bloom. Additional comments: I support the TCRCD’s candidacy as a donee for the Kennedy Meadows property. I frequently enjoy the unspoilt wilderness that is Kennedy Meadows and implore you to transfer the property to TCRCD, which will be a conscientious steward of this unique piece of land. Thank you!	Greg Francis	No	Comment noted. The Stewardship Council is developing an explicit set of criteria that will be used to determine which potential donees are qualified to participate in the disposition process. Qualified conservation easement and fee simple donees will be determined during the disposition process (Volume III). There will be opportunities for the public and stakeholders to engage with the Stewardship Council and other stakeholders on this topic as well as other topics related to the disposition and future management and stewardship of the lands. The people at KM have been very accommodating to us. This is a very special place. We would hate to see something happen where it's not available as it stands now. Please allow PG&E to hold onto this property and make available to the current property owner Matt Bloom. Thank you for your consideration.</p>	<p>Kathy Gass & Kaj Nereaux</p>	<p>No</p>	<p>Comment noted. As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands. In addition, the Stewardship Council has developed potential measures to preserve and enhance the Beneficial Public Values (BPVs) at Kennedy Meadows. Should these potential measures be implemented, they are not expected to negatively affect the pack station or other resources, but rather enhance the facility and BPVs within the planning unit. As per the Settlement Agreement and Stipulation, PG&E must protect all of the Watershed Lands with perpetual conservation easements and/or donate the lands in fee title to a qualified donee (public entity, non-profit organization) those lands that are deemed not necessary for current and future operations and maintenance of their hydropower projects. Donated lands must also be protected with perpetual conservation easements to be held by a third party. The Stewardship Council is developing an explicit set of criteria that will be used to determine which potential donees are qualified to participate in the disposition process. Qualified conservation easement and fee simple donees will be determined during the disposition process (Volume III). There will be opportunities for the public and stakeholders to engage with the Stewardship Council and other stakeholders on this topic as well as other topics related to the disposition and future management and stewardship of the lands. The Stewardship Council will provide public notice and encourage participation in meetings, workshops, and other appropriate methods of participation in the planning process. See response to Matt Bloom form letter comment.</p>

Form letter – see comment from Matt Bloom. Additional comments: Please do not let into the hand of the USFS.	Rourke Hembree	No	Comment noted. The Stewardship Council is developing an explicit set of criteria that will be used to determine which potential donees are qualified to participate in the disposition process. Qualified conservation easement and fee simple donees will be determined during the disposition process (Volume III). There will be opportunities for the public and stakeholders to engage with the Stewardship Council and other stakeholders on this topic as well as other topics related to the disposition and future management and stewardship of the lands. The Stewardship Council will provide public notice and encourage participation in meetings, workshops, and other appropriate methods of participation in the planning process. See response to Matt Bloom form letter comment.
Form letter – see comment from Matt Bloom. Additional comments: TCRCDC excellent choice.	Roxanne Crawford	No	Comment noted. The Stewardship Council will provide public notice and encourage participation in meetings, workshops, and other appropriate methods of participation in the planning process. See response to Matt Bloom form letter comment.</p>
<p>Form letter – see comment from Matt Bloom. Additional comments: I would hate to see anything change at Kennedy Meadows. We are now sending our grandchildren there and enjoying our time as always!!</p>	<p>Virginia Madison</p>	<p>No</p>	<p>As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands. In addition, the Stewardship Council has developed potential measures to preserve and enhance the Beneficial Public Values (BPVs) at Kennedy Meadows. Should these potential measures be implemented, they are not expected to negatively affect the pack station or other resources, but rather enhance the facility and BPVs within the planning unit. See response to Matt Bloom form letter comment.</p>

<p>Form letter – see comment from Matt Bloom. Additional comments: Stabilize the stream banks! Establish a barbless fly/lane section between the bridge at the top of the gorge and the confluence with Deadman’s Creek. This section is full of undersize native trout and if properly managed through size/possession limits (e.g. Middle Fork below Beardsley) could provide excellent sustainable fishing without DFG plants. Keep the pack station. Graze cattle only if there is a net environmental benefit.</p>	<p>Walter D. Harvey</p>	<p>No</p>	<p>Comment noted. As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands. In addition, the Stewardship Council has developed potential measures to preserve and enhance the Beneficial Public Values (BPVs) at Kennedy Meadows. Should these potential measures be implemented, they are not expected to negatively affect the pack station or other resources, but rather enhance the facility and BPVs within the planning unit. The issue of existing pass-through cattle grazing is being studied and is under the jurisdiction of the pending FERC New License Order. Likewise, regarding bank stabilization, FERC will address topic in the New License Order. All future Stewardship Council recommendations regarding these two issues will be consistent with the FERC license requirements. As for fishing regulations and management, the Fish and Game Commission and California Department of Fish and Game are responsible for these issues. See response to Matt Bloom form letter comment.</p>

<p>Form letter – see comment from Matt Bloom. Additional comments: I have been packing out of Kennedy since 1976. Our family has experienced many great vacations in the high country. The Back Country horsemen do a great job of improving and maintaining the trails. Please leave Kennedy Meadows to its current management, it's a great family destination. I fear US Forest Service management would involve unnecessary government regulations. This would destroy the current charm as well as history of Kennedy for future generations.</p>	<p>Wilbert Amador</p>	<p>No</p>	<p>Comment noted. As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands. In addition, the Stewardship Council has developed potential measures to preserve and enhance the Beneficial Public Values (BPVs) at Kennedy Meadows. Should these potential measures be implemented, they are not expected to negatively affect the pack station or other resources, but rather enhance the facility and BPVs within the planning unit. The Stewardship Council is developing an explicit set of criteria that will be used to determine which potential donees are qualified to participate in the disposition process. Qualified conservation easement and fee simple donees will be determined during the disposition process (Volume III). There will be opportunities for the public and stakeholders to engage with the Stewardship Council and other stakeholders on this topic as well as other topics related to the disposition and future management and stewardship of the lands. The Stewardship Council will provide public notice and encourage participation in meetings, workshops, and other appropriate methods of participation in the planning process. See response to Matt Bloom form letter comment.</p>
<p>Form letter – see comment from Matt Bloom. Additional comments: Please keep this unique high Sierra property intact. Let Kennedy Meadows continue the way it has for 90 years! As a California native, I ask the S.C. to help keep this piece of old California alive.</p>	<p>William P. <p>Form letter – see comment from Matt Bloom. Additional comments: This beautiful place should stay just as it has. Only TCRCDC can keep it the same. No Forest Service please!!</p>	<p>Wyatt York</p>	<p>No</p>	<p>Comment noted. As per the Stipulation, conservation easements must honor existing economic uses on the Watershed Lands.
