COW-BATTLE CREEK WATERSHED			
Kilarc Reservoir Planning Unit			
Management direction provided for this planning unit should avoid any possible conflict with the decommissioning of the Cow-Kilarc project.	Friends of the River	No	Comment noted. The text in Volume II acknowledges possible crossover with the decommissioning process by stating: "All recommended measures must be coordinated with the decommissioning process to avoid inconsistent or duplicative recommendations. When the decommissioning process is completed, the planning unit will need to be re-evaluated based on the outcome."
The LCP as proposed is supported.	Thomas Glenn Dye	No	Comment noted.
