KERN-TULE RIVER WATERSHED			
Kern River Planning Unit			
<p>North of the River Recreation and Park District (NOR) has reviewed the referenced project. If any of the Kern River properties interface with NOR park sites, such as Riverview Park which backs up to the river west of Chester Avenue, this entity is interested in opportunities that could be developed to offer access to the Kern River. Other access points on the north side of the Kern River could be beneficial to NOR's constituents. Thanks for any consideration that can be given to these NOR identified needs.</p>	<p>Colon G. Bywater</p>	<p>No</p>	<p>Comment noted. Unfortunately, the land within the Kern River Planning Unit is located several miles upstream of Bakersfield and Riverview Park. The parcels within the planning unit also do not offer good opportunities to provide access to the north side of the river, as the small parcel at the mouth of the canyon is largely occupied by the Kern Canyon Powerhouse and is accessible only via the powerhouse access road.</p>
