PIT-MCLOUD RIVER WATERSHED			
Fall River Mills Planning Unit			
<p>In general there seems to be a greatly disproportionate emphasis placed on Native American interests. The culture of the non-Native American population, far and away the vast majority, is as important as any other culture. Care should be taken not to allow the squeaking wheel to get all the grease.</p>	Anonymous	No	<p>Comment noted. The Stewardship Council acknowledges that both the cultures of Native Americans and non-Native Americans are important and are therefore both incorporated into potential measures for this planning unit.</p>
<p>Supporting Analysis, P2, Potential Measure, "Require regular clean up of debris..." The house keeping at the Club has been satisfactory to the land owner for 30 years. The Club land and facilities are well maintained. Work parties are scheduled throughout the year on the annual activities calendar.</p>	Anonymous	No	<p>The Stewardship Council has become aware of scheduled "work parties" at the club, and noticed improvements to the club on a recent field trip including signage regarding clean-up of shells, and the reduction in debris.</p>
<p>General Comment. All Cultures deserve respect. The Culture of marksmanship predates the American Revolution. It has been an integral part of American life for centuries. The HCR&PC has used the current location continuously for 30 years without complaint from any source. Our Culture should not be infringed upon by the SC without substantial proof of significant real, not potential, harm to something or someone.</p>	Frank Ryan	No	<p>Comment noted. The Stewardship Council respects the culture of and activities provided by the Hat Creek Rifle and Pistol Club. The potential measure regarding a "noise survey" was developed to identify and mitigate any noise issues that may exist. Which measures are carried forward into implementation will be determined during the disposition process. There will be opportunities for the public and stakeholders to engage with the Stewardship Council and other stakeholders on this topic as well as other topics related to the disposition and future management and stewardship of the lands. The Stewardship Council will provide public notice and encourage participation in meetings, workshops, and other appropriate methods of participation in the planning process.</p>

Public Comments and
Response to Comments on LCP Volume II

Comment	Commenter	Edit to Vol II Made	Response
<p>Page 2, paragraph one, line 4, pleased to see the intent to honor existing agreements for economic uses.</p> <p>Page 2, paragraph 3, line 9, pleased to see the recognition that some of the proposed measure may be deleted as more information is acquired.</p> <p>Page 9 last paragraph, line 11, "...conservation easements to protect any cultural resources..."</p> <p>Suggest adding the modifier "significant" between "any" and "cultural" to be consistent with the language used throughout the LCP.</p> <p>The phrasing at present is too broad and does not allow for reasonable judgment to be used.</p>	Frank Ryan	No	<p>Comment noted. The Stewardship Council has used this somewhat standard ("Incorporate cultural resource protection measures in conservation easements to protect any cultural resources found in the future in coordination with Native American entities") to allow for the fact that there is little, if any, information regarding cultural resources on Watershed Lands outside the FERC boundaries; as well as on FERC-related lands under licenses that have not gone through relicensing in the recent past. Which measures get carried forward into implementation will be determined during the disposition process. There will be opportunities for the public and stakeholders to engage with the Stewardship Council and other stakeholders on this topic as well as other topics related to the disposition and future management and stewardship of the lands. The Stewardship Council will provide public notice and encourage participation in meetings, workshops, and other appropriate methods of participation in the planning process.</p>
<p>Page 5, Stewardship Council Recommendations section: We support the preservation and enhancement of the recreation facilities in the Planning Unit. The economies of the local communities are stimulated by the out of area sportsmen who visit the area. The Rifle and Pistol Club draws many out of area visitors each year.</p>	Frank Ryan	No	Comment noted.
<p>Page 8, line 7, Any studies involving the Hat Creek Rifle and Pistol Club should be closely coordinated with the Club as well as any other potentially affected parties. Great care must be taken to assess the real and on going cultural values and the extent of any real and significant impacts on neighboring properties or activities.</p>	Frank Ryan	Yes	Text has been added to the main Volume II and to the Supporting Analysis for Recommendations regarding the potential measure to determine noise impacts from the club. Added text states that the proposed measure should be coordinated with the club and any other potentially affected parties.
<p>Previous reference to Page 9, last paragraph, line 11 should read line 10.</p>	Frank Ryan	No	Comment noted.
<p>This concern the Supporting Analysis for Recommendations.</p> <p>Page 2, Potential Measure: Require regular clean up of debris at the Hat Creek Rifle and Pistol Club, line 2, We are very pleased the recognition of the popularity of the Club and the high volume of use it gets. In addition to the 200 plus regular members there are over 30 Law Enforcement Officers who use the Club's facilities for training.</p>	Frank Ryan	No	Comment noted.

<p>Friends of the River recommends that PG&E lands available for disposal in this planning unit be allocated to the BLM to expand existing public lands and enhance public access to the segment of the Pit River recommended for National Wild & Scenic River status.</p>	<p>Friends of the River</p>	<p>No</p>	<p>Comment noted. The Stewardship Council is developing an explicit set of criteria that will be used to determine which potential donees are qualified to participate in the disposition process. Qualified donees will be determined during the early stages of developing the Disposition Packages (Volume IIIs). There will be opportunities for the public and stakeholders to engage with the Stewardship Council and other stakeholders on this topic as well as other topics related to the disposition and future management and stewardship of the lands. The Stewardship Council will provide public notice and encourage participation in meetings, workshops, and other appropriate methods of participation in the planning process.</p>
<p>In 1952, the Fall River Lions Club built, and has since maintained for the free use of the general public, a small park on the banks of the Pit River just downstream from the Pit One Powerhouse. The membership of the Lions Club would like to encourage the Stewardship Council to carefully consider this parks historical and recreational value to the community it serves when deciding its fate.</p>	<p>Gary Derenia</p>	<p>No</p>	<p>Comment noted.</p>
